

## Duette® Shades

An extensive choice of fabrics to control light and privacy as desired

### New Operating Systems:

The Luxaflex® LiteRise® cordless operation system allows the user to raise and lower your blind with just a touch of the hand. Simply place your hand on the bottom bar handle and either push up or pull down to lower. Your shade stays right where you want it without any springing up or dropping down. Not only does the proprietary design hold the shade securely in any desired position but the elimination of lift cords gives the blind a clean, uncluttered look and provides increased safety for children and pets.

The second new system, called Luxaflex® SmartCord®, is a revolutionary new operating system that uses a retractable cord mechanism to raise and lower the blind. With just a single stroke of the cord, this incredible new system allows the user to lower the blind to the required position and the constant cord length means there are never any long, dangling cords to detract from the appearance of the shade.

Unique hexagonal honeycomb fabric with fixed pleat that resist fraying.

Fixé pleat ensures pleat retention. Fabric won't hang flat.

Fabrics are UV protected and washable in luke warm water. BLOCK OUT EXCLUDED.

Excellent insulation & acoustical properties.

Rails and componentry available in 5 colours.

Shockproof cord lock holds the blind in any position.

Cord operated models have breakaway cord connectors and cleats for improved child safety. Handle operated models and CHR models are child safe as standard.

window styling

Motorisation options: Battery powered- & 24V systems available.

Duette<sup>®</sup> fabrics are supplied with a pleat width of 32mm.

Duotone, Elan, Sheer and Batiste fabrics can be fully immersed in cold water for cleaning.
