

Silhouette® Shades

Gentle translucency for an endless variety of moods

With the ingenious construction of Silhouette® Shades you are choosing soft fabric vanes that seem to float between sheer facings. They allow you to subtly filter the incoming light in your home and determine the degree of privacy.

“Silhouette® Shades give my living room a luxurious feeling”

Cleaning instructions

Regular dusting with a feather duster is usually sufficient to keep the shade clean and attractive for a long time.

More thorough dusting can be achieved with a hand-held vacuum cleaner at the lowest setting. Drag the nozzle of the vacuum cleaner along the side of the fabric so that the dirt between the front and back of the shade is collected. You can also use a hair dryer on the coolest setting to blow the dust out of the side of the fabric.

Stubborn dirt and stains can be removed by immersing the product in a bath (max. 30°C) with a non-synthetic detergent. Then rinse with clean water, hang up and allow to dry with the slats in the closed position.

TAKE CARE not to get the headrail wet!

If the shade is wider than the bath, you can wipe the fabric with a soft sponge or have it cleaned by a professional cleaning company with ultrasonic cleaning techniques.

All Luxaflex® Silhouette® Shade fabrics are made from 100% polyester, which means that they are hard-wearing and strong. Always clean carefully and avoid creasing the fabric, especially where the slats are attached to the voile facings. Should creases occur, these will usually fall out after a short time.

TAKE CARE: do not iron Silhouette® Shades!

Disclaimer:

The cleaning advice has been compiled with care. Nevertheless, no liability can be accepted for the cleaning results.

window styling

The Luxaflex® Silhouette® Shade is perfectly suitable for optimum light and temperature regulation and for protection of your work area. Light shading can be regulated through the inclines of the tilts completely as you would like. The insulating effect of the Silhouette® makes a noticeable contribution to overall thermal insulation

The Silhouette® Shade has favourable energy throughput values and protects against harmful UV rays. In closed position it prevents reflections and loss of contrast, when open you have a free, light view.
