

## OUTDOOR BLINDS

The Outdoor Blind is the modern alternative for enclosing your patio. The hi-tech fabrics are specifically formulated and manufactured to withstand the sun's harmful UV rays while protecting your furniture. Lower and raise the blind using a removable crank handle or motorise your blind.

## REFLECT YOUR STYLE

The blind is secured at the bottom with a selection of hold down clips, which allows the blind to remain down during windy weather. You can also select a Channel X Blind that is fully enclosed on the top and sides. The Outdoor Blind will allow you maximum use of your external entertainment areas by stopping heat and glare and also providing a degree of weather protection while maintaining your view.
